## Dogs vs. Cats

Create an algorithm to distinguish dogs from cats

215 teams · 5 years ago

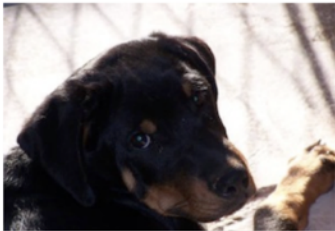

[Overview](#) [Data](#) [Kernels](#) [Discussion](#) [Leaderboard](#) [Rules](#) [Team](#)

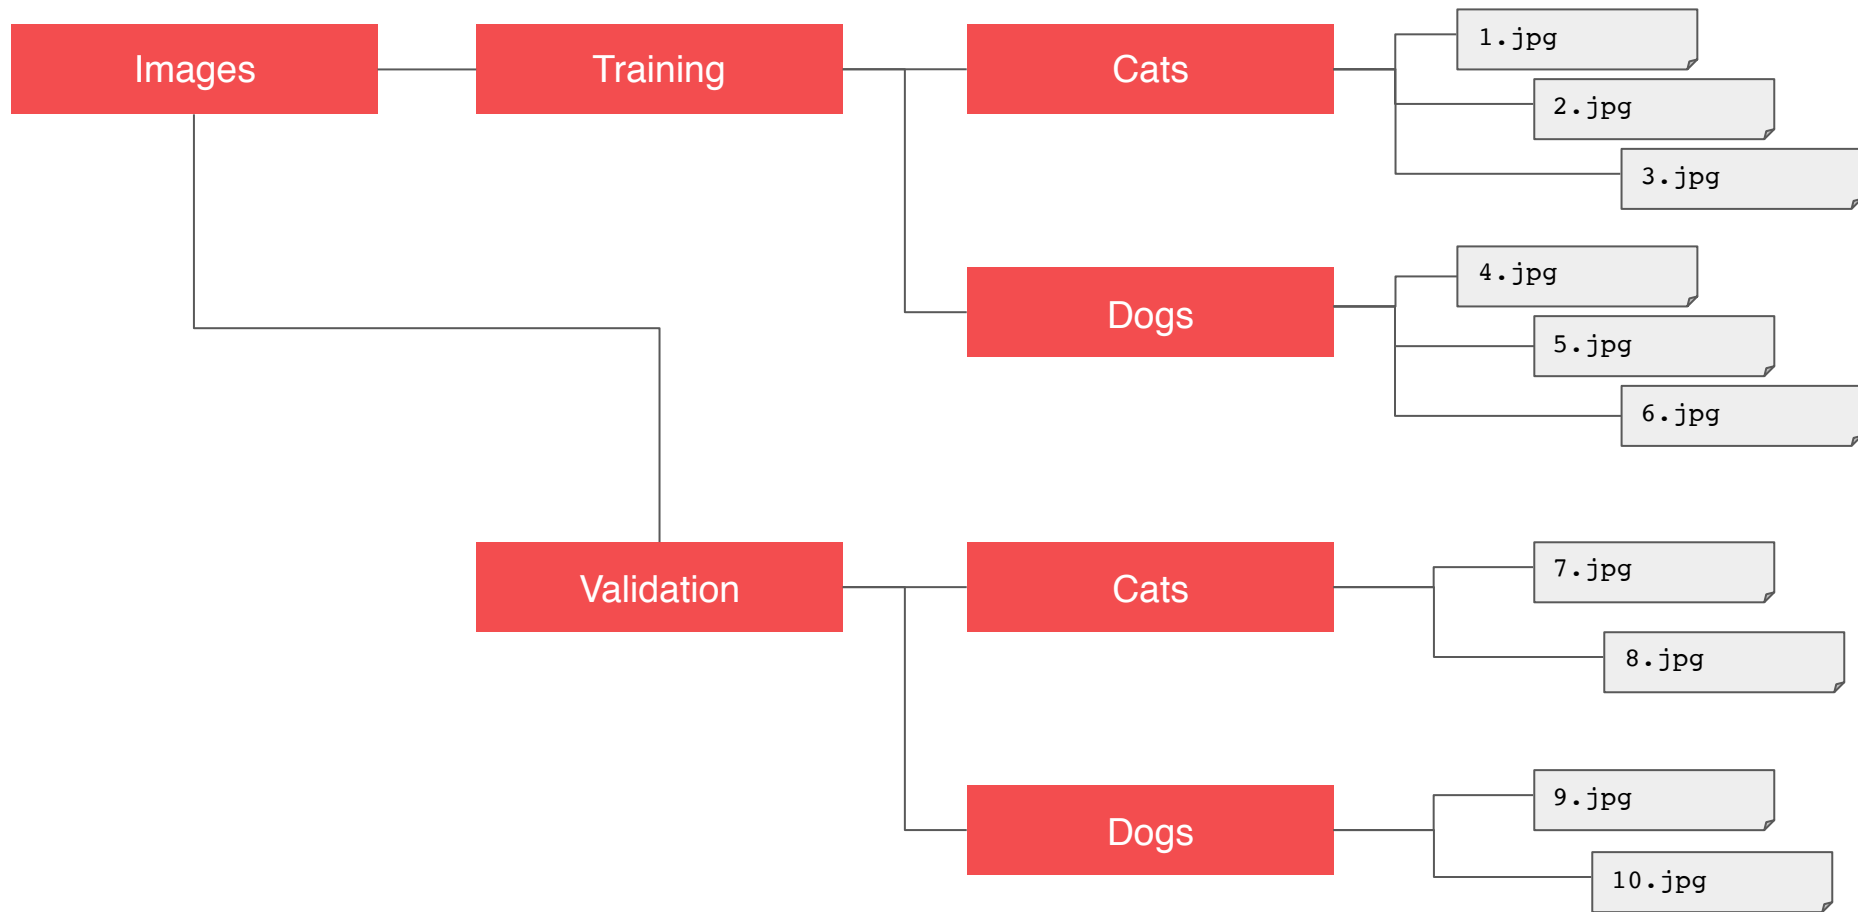

### Data Description

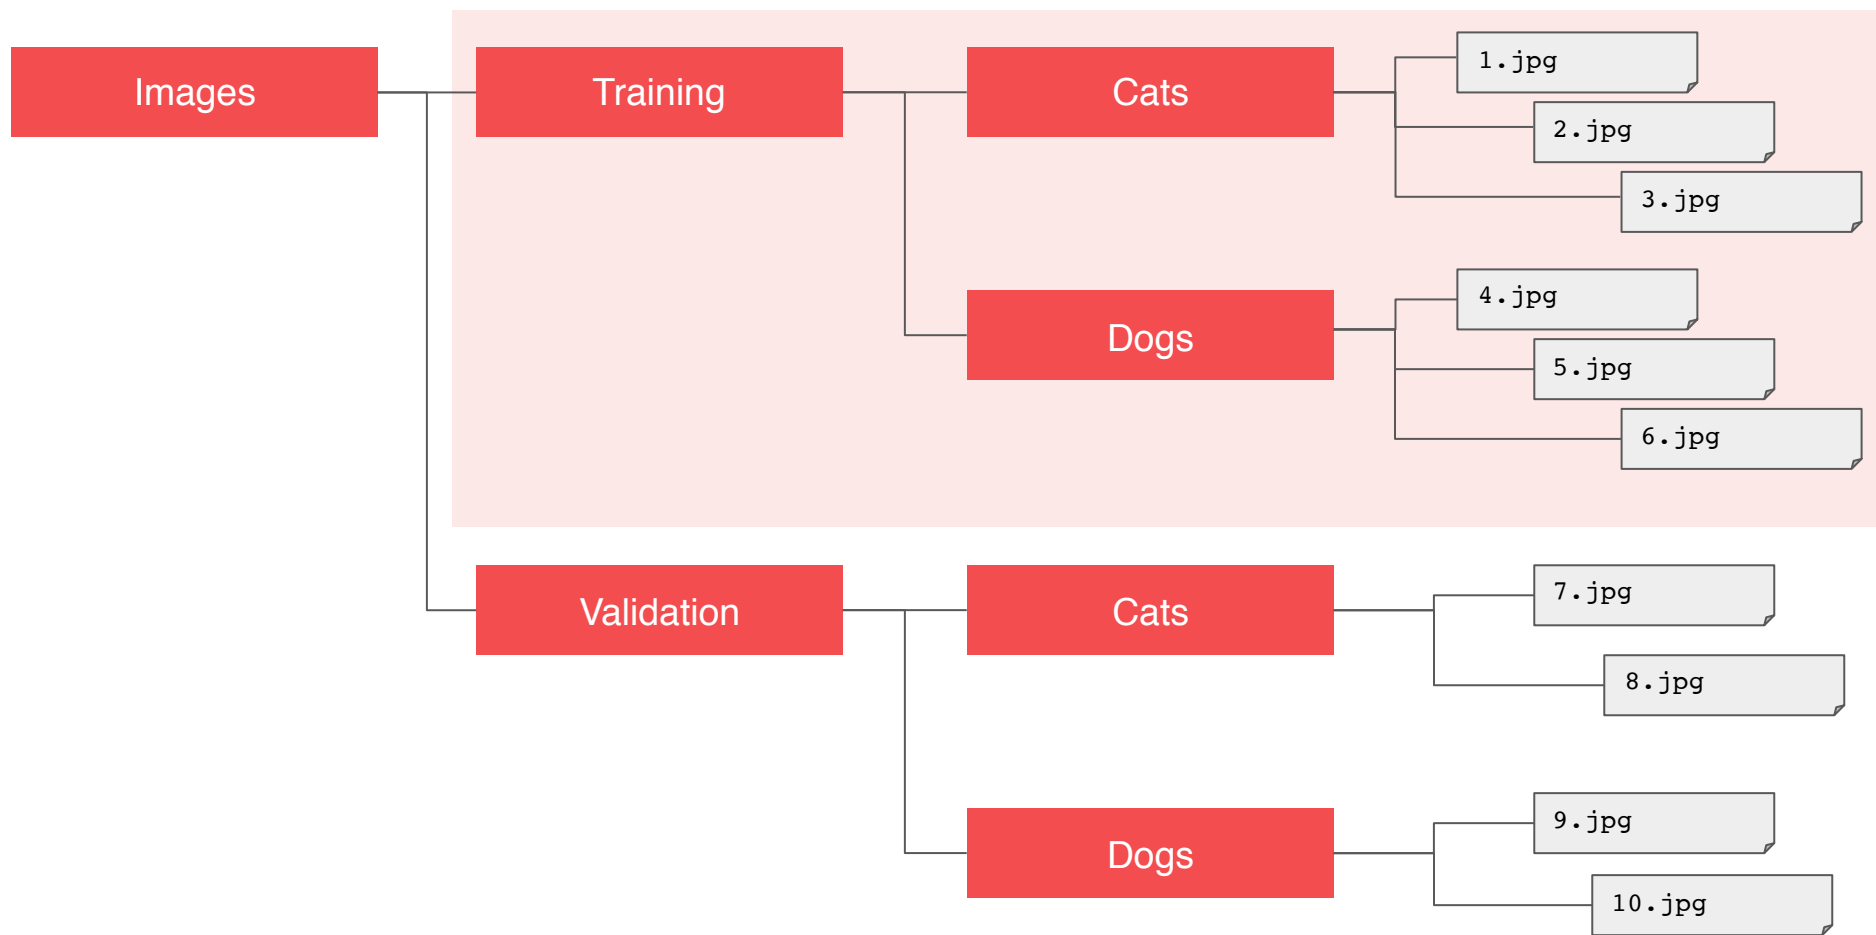

The training archive contains 25,000 images of dogs and cats. Train your algorithm on these files and predict the labels for test1.zip (1 = dog, 0 = cat).

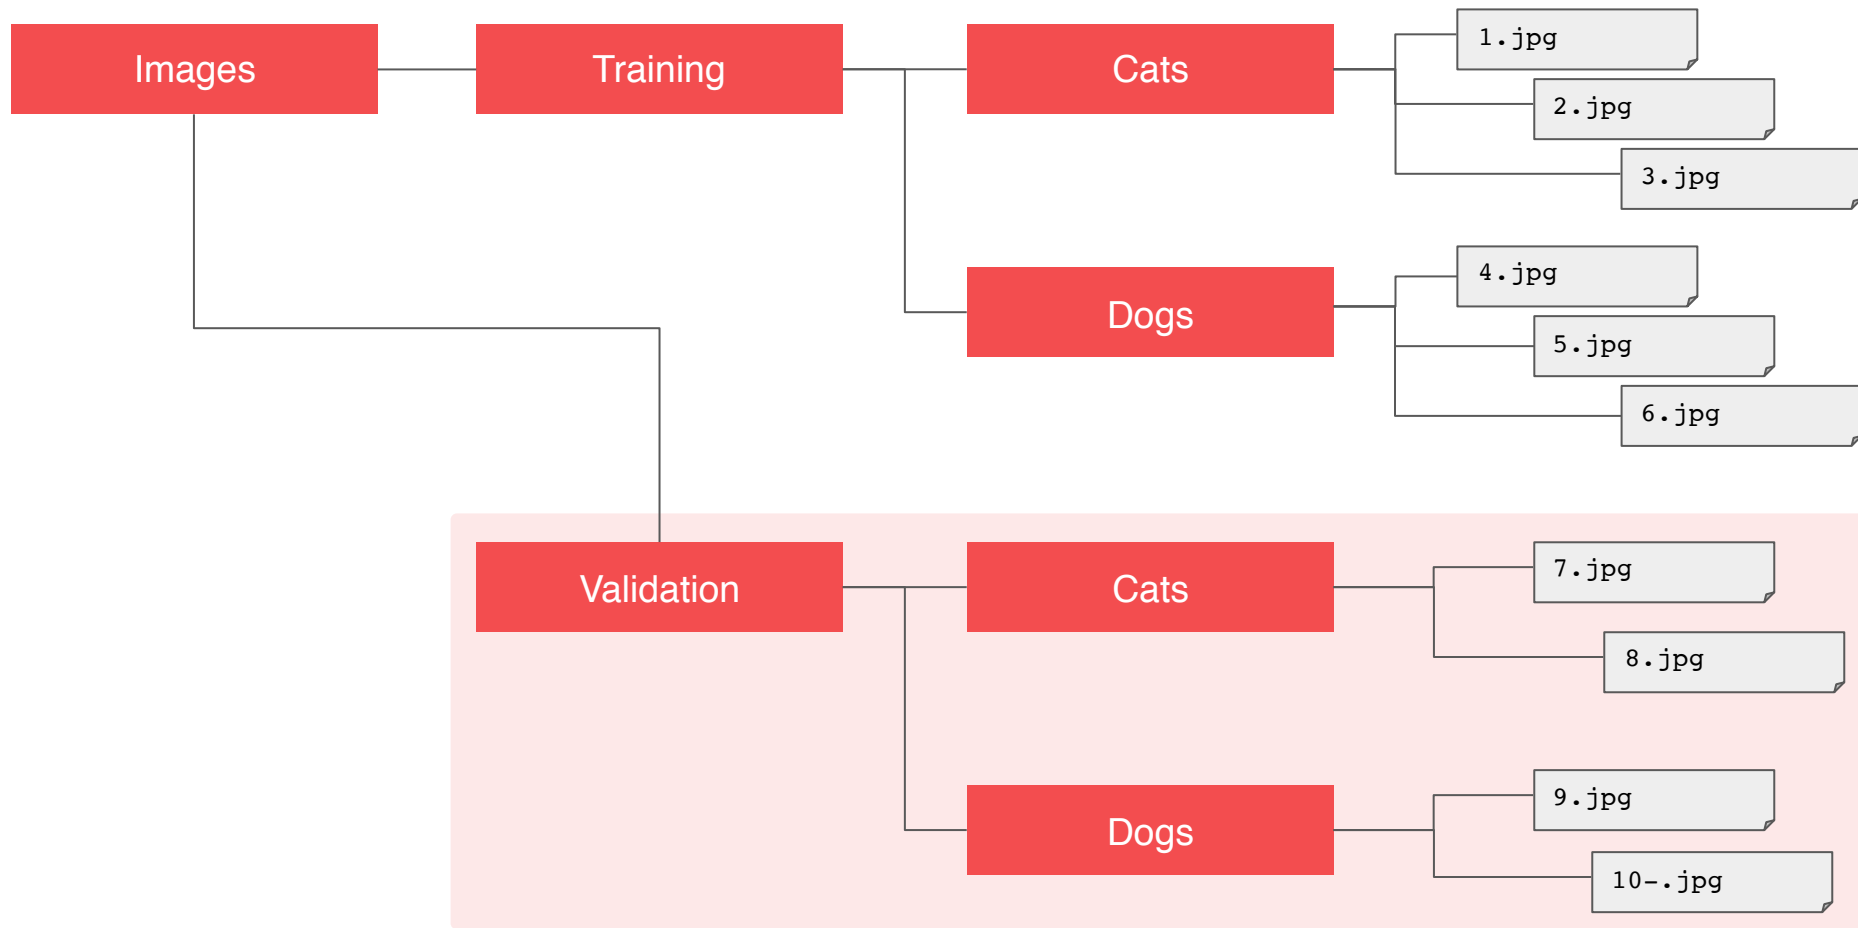

### A note on hand labeling

Per the rules and spirit of this contest, please do not manually label your submissions. We work hard to fair and fun contests, and ask for the same respect in return.

```
from tensorflow.keras.preprocessing.image  
import ImageDataGenerator
```

```
train_datagen = ImageDataGenerator(rescale=1./255)
```

```
train_generator = train_datagen.flow_from_directory(  
    train_dir,  
    target_size=(150, 150),  
    batch_size=20,  
    class_mode='binary')
```

```
train_datagen = ImageDataGenerator(rescale=1./255)
```

```
